

Contentment with Life Assessment Scale (CLAS)

This scale assesses wellbeing through measuring contentment and fulfillment, along with the self-discrepancies individuals feel towards their life. It is a brief 5-item survey with responses on a 7-point scale. Appropriate for anyone, it requires only a citation for use. Test reliability can be found in Lavalley et al. (2007).

Pros for Schools

Cons for Schools

Possibly too short for a robust understanding (5-items)
Less tested than other measures

Suggestions for Further Research
